Foreign investor shareholding	INTESA SANPAOLO S.p.A. (Italy) owns 100% of the Bank’s share capital
Reporting period	From 1 January to 30 September 2026
Reporting currency and measurement unit	UAH thousand

JSC “PRAVEX BANK” (hereinafter referred to as the Bank) is a universal financial organization that provides full range of banking services on the territory of Ukraine. Due to the well-developed network, JSC “PRAVEX BANK” is represented in most regions of our country. The strategic goal of JSC “PRAVEX BANK” is to create a universal bank that provides a full range of banking services to legal entities and individuals with an emphasis on digitalization, increasing customer focus, cybersecurity and adaptation to changes in the regulatory environment.

Note 2. Economic and operational environment of the Bank

The Bank's activities are carried out in Ukraine, whose economy belongs to the category of developing countries.

The war continues. Currently, Russia's air terror of Ukraine is intensifying. In recent months, the focus of Russian attacks has changed from energy and mining facilities to business production facilities and logistics facilities, in particular the blockade of seaports. This significantly limits economic activity and at the same time increases the costs of enterprises.

More significant economic growth is hampered by the consequences of russia's intensified attacks, significant military destruction, further deterioration of the security situation, destruction of logistics, production facilities and warehouses, rising costs of enterprises due to rising fuel prices, limited domestic supply of goods and services, shortage of qualified personnel, as well as a slight strengthening of exchange rate expectations. At the same time, the positive factors were the stable situation with energy supply, the easing of fiscal policy, and a large-scale economic impetus due to the allocation of part of external financing to the localization of arms production, a high harvest and the opening of new logistics routes.

In July 2026, the NBU improved its forecast for real GDP growth for 2026 to 1.8%.

The employment situation remained ambiguous. Thus, the shelling of infrastructure and the increase in the duration of air raids in large cities led to a significant reduction in the demand for new workers in the most affected industries. At the same time, the cooling of the labor market has not yet affected the level of wages, which continued to grow.

The state budget deficit, excluding grants, in revenues slightly decreased in September, but remained significant due to high expenditures. Since the beginning of the year, the deficit has significantly exceeded last year's level. Financing of budget needs was provided at the expense of both funds accumulated in previous periods and current international aid receipts, including the defense component under the Ukraine Support Loan (USL) program. However, external aid was received in smaller volumes than expected.

As of September 29, 2026, Ukraine has received external support in the amount of USD 36 billion, including Ukraine Support Loan (USD 17.3 billion) and ERA (USD 10.5 billion). From June 2026, Ukraine began receiving tranches under the USL program. In July, the IMF approved the first review of the four-year Extended Fund Facility (EFF) program.

In September 2026, inflation accelerated to 10.0% year-on-year. On a monthly basis, prices increased by 2.1%.

In September 2026, the NBU raised the key policy rate to 16% in view of persistent fundamental price pressures in order to maintain the attractiveness of hryvnia assets and the stability of the foreign exchange market.

The key policy rate hike in September supported the attractiveness of hryvnia assets and the demand for them. In the second quarter, the volume of banks' net assets increased by 3.4% (+16.4% yoy), which compensated for the decrease in the first quarter. Active bank lending has remained the key driver of net asset growth for more than two years in a row. Thus, the volume of the loan portfolio in the second quarter increased by 6.9% (+31.6% yoy). The share of loans in the structure of net assets increased by 1 pp quarter-on-quarter (+3.4 pp y-o-y) to 29.8%. At the same time, the portfolio of government bonds for the quarter decreased by 4.7% (+8% yoy) due to bond redemption and seasonal supply reduction by the government. As a result, banks redistributed free funds in favor of the NBU Security Service (+15.7% quarter-on-quarter (+22.5% yoy)).

The quality of the loan portfolio remained high. The share of non-performing loans (NPLs) decreased: by 0.5 pp for the quarter (-14.6 pp for the year) to 12.5%. The share of NPL of business decreased to 15%: by 0.8 pp for the quarter (-20.5 pp for the year). The share of NPL of individuals amounted to 10.1%, decreasing by 0.2 pp (-3.8 pp for the year).

Bank liabilities increased by 3.9% in the second quarter (+15.9% yoy). Customer deposits began to grow after a seasonal outflow in the first quarter. At the same time, net demand for foreign currency increased.

During the second quarter of 2026, the number of operating banks increased by one to 59.

In the second quarter of 2026, the sector received UAH 28 billion in profit, 7.6% more than in the previous quarter. The sector's profit decreased by 30% compared to the previous year due to a higher income tax rate. At the same time, profit before tax increased by 6.5% yoy, 14 small banks were unprofitable with a total loss of only UAH 0.1 billion. Profitability was provided by a high net interest margin and moderate provisions.

As of August 31, 2026, the banking sector received UAH 71.7 billion in profit. 9 banks were unprofitable.

Total return on assets for the second quarter increased by 0.1 pp due to an increase in the profitability of the corporate and retail loan portfolio. The cost of funding was unchanged during the quarter, despite an increase in rates on new deposits due to a decrease in the cost of balances in the corporate segment. Therefore, the net interest margin for the quarter increased by 0.1 pp to 7.8%, while net interest income increased by 4.3% (20.2% yoy). Net fee and commission income increased by 10.2% (+6.5% yoy) compared to the first quarter, primarily due to income from payment transactions. At the same time, profit from currency purchase and sale transactions decreased slightly compared to the previous quarter, remaining higher than in 2025. The positive result of the revaluation of government bonds was half as low as in the first quarter and 7.1% higher than in the second quarter of last year. Operating expenses for the second quarter increased by 6.7% (+18.2% yoy) due to an increase in personnel costs and maintenance of property, plant and equipment and intangible assets. The ratio of operating expenses to operating income (CIR) of the sector has not changed significantly for four years in a row: 42.4% compared to 40.9% in the second quarter of 2025. During the second quarter, the regulatory capital of the banking sector increased by 20.5%, primarily due to the profit of the previous year, which provided an opportunity for expansion of lending. The capital adequacy of the banking sector also increased to more than 17.5%.

Since the beginning of 2026, international rating agencies have revised and affirmed Ukraine's rating due to the prolonged war with Russia at the following levels:

- On 20 August 2026, Rating and Investment Information upgraded Ukraine's long-term foreign currency sovereign rating to 'CCP-'. Referring to the expectation that Ukraine will provide budget financing and foreign exchange liquidity for the coming years, given the completion of the restructuring of GDP-linked guarantees in December 2025, as well as taking into account the extended deferral of debt payments provided by the Group of Creditors of Ukraine, as well as financing from the IMF.
- On 24 April 2026, Fitch Ratings affirmed Ukraine's long-term foreign currency issuer default rating at 'CCC'. Citing expectations that a manageable debt service profile in the near term, strong foreign exchange reserves, and significant support from official partners, including the EU, will balance the macroeconomic and fiscal consequences of the war. Fitch does not typically assign projections to sovereign ratings rated 'CCP+' or below.
- On January 22, 2026, Standard & Poor's upgraded Ukraine's long-term and short-term sovereign foreign currency sovereign credit ratings from 'SD/SD' to 'CCC+/C'. The outlook for the long-term local currency rating remains stable. At the same time, the agency affirmed its long-term and short-term local currency sovereign ratings at 'CCC+/C' and the national scale rating at 'uaBB'. Referring to expectations that after the exchange of Ukraine's GDP warrants in the amount of USD 2.6 billion for new Type C bonds and existing Type B bonds is completed, at the end of December 2025.

These financial statements reflect management's current assessment of the impact of business conditions in Ukraine on the Bank's continuing operating and financial condition during the war. Future conditions for continuing operations may differ from those of management personnel.

Note 3. Basis of preparation

These interim condensed financial statements for the nine months ended September 30, 2026, have been prepared in accordance with IAS 34 “Interim Financial Reporting” and the requirements of the Law of Ukraine “On Accounting and Financial Reporting in Ukraine” No. 996-XIV dated July 16, 1999, regarding the preparation of financial statements (as amended) (hereinafter referred to as the “Law on Financial Reporting”). These statements do not contain all the information and disclosures required for annual financial statements and should be considered in conjunction with the Bank’s annual financial statements for the year ended December 31, 2025, prepared in accordance with International Financial Reporting Standards (hereinafter “IFRS”). The accounting policies applied in the preparation of these interim financial statements are consistent with those applied in the preparation of the Bank’s annual financial statements for the year ended December 31, 2025.

These financial statements have been prepared under the historical cost convention, except for the initial recognition of financial instruments at fair value, the subsequent measurement of buildings at revalued cost and derivative financial instruments, financial assets at fair value through other comprehensive income at fair value.

Estimations uncertainty

The preparation of financial statements in accordance with IFRS requires the management to use judgements, estimates and assumptions that affect the application of accounting policies. Actual results may differ from those estimates.

The estimates and related assumptions are reviewed on an ongoing basis. Changes in estimates are recognised in the period in which estimates were revised and in all subsequent periods. Further information on estimates is disclosed in Note 4.1 Significant accounting judgments and estimates.

Going concern

These financial statements are prepared based on the assumption that the Bank will continue to operate for the foreseeable future. In preparation of these financial statements, the Bank has made an assessment of its ability to continue as a going concern.

These financial statements reflect management's current assessment of the impact of the Ukrainian business environment on the going concern and the financial position of the Bank in the context of the ongoing hostilities. The future business environment may differ from management's assessment.

The war continues and continues to pose a threat of a long-term decline in Ukraine's economic potential, particularly due to the loss of lives, territory, and industrial capacity. This continues to negatively impact the country's political and business environment: due to rising inflation and the devaluation of the hryvnia, the NBU's monetary policy remains tight and aimed at gradually reducing inflation, while the destruction of energy facilities, logistics infrastructure, gas infrastructure, production facilities, and warehouses, along with rising corporate costs due to higher fuel prices, power outages, and labor shortages, continue to undermine production processes. Despite substantial international support, shortages of capital and labor, along with the destruction of infrastructure, are significantly hampering business activity and the potential for recovery.

Despite the difficult challenges caused by the long-term war, the Bank continues to ensure continuous and stable operations, actively adapting to changing conditions. Efforts are aimed at maintaining and strengthening the status of a reliable, solvent and customer-oriented Bank that supports the country's economy and responds to market needs in the face of crisis factors. To this end, the Bank has took the following measures:

- continued to focus on effective liquidity management, ensuring that liquidity is maintained at a stable and acceptable level;
- actively worked towards attracting customer funds sufficient for the Bank to ensure investments in the monetary instruments of the NBU, financing the Bank's loan portfolio and maintaining a stable resource base and a high level of liquidity;
- revised the limits on securities, which allowed the Bank to place free liquidity in hryvnia with a maturity of up to 3-4 years in more profitable financial instruments;
- conducted discreet lending to clients with a focus on client profile, profitability and direct impact on regulatory capital;
- worked to improve the operational efficiency of the Bank by implementing measures to optimize administrative costs;
- worked towards reducing and optimizing operating and administrative costs, including by revising the cost structure in accordance with the urgent needs of the Bank and while maintaining operational capacity;
- improved the level of online customer service by implementing modern digital solutions, increasing the convenience, speed and security of services, which is especially important in the face of increased competition in the market.

The parent company has provided written assurances in the form of a letter of support stating that the parent company confirm its willingness to provide, for a period of not less than twelve months from the date of approval of the Bank's financial statements, the support, as may be reasonably necessary to enable the Bank to continue its operations and settle its obligations in the ordinary course of business.

There is a material uncertainty related to the Bank's ability to implement the above measures due to currently unpredictable impact of ongoing hostilities in Ukraine on the assumptions applied by the management. This may cast significant doubt on the Bank's ability to continue as a going concern and, therefore, it may be unable to realise its assets and discharge its liabilities in the normal course of business.

Note 4. Material accounting policy information

4.1. Significant accounting judgments and estimates

The preparation of financial statements requires the application of estimates and assumptions that may have a significant impact on the amounts presented in the statement of financial position, the statement of profit or loss and the statement of comprehensive income, as well as on the amounts of assets and liabilities recorded in the financial statements. Estimates are based on available information and subjective judgments, often based on past experience, which are used to make reasonable assumptions that will be made in assessing operating results. Given their nature, the estimates and assumptions used may change from year to year and, therefore, it cannot be excluded that the current amounts presented in the financial statements may differ materially in future financial years as a result of changes in subjective measurements made.

The main cases in respect of which the Bank's management must make subjective assessments include:

- estimation of expected losses on loans and other financial assets;
- estimates and assumptions about the possibility of realization of deferred tax assets.

The Bank recognises expected credit losses on the following financial instruments that are not measured at fair value through profit or loss:

- financial assets that are debt instruments;
- accounts receivable;
- issued financial guarantee agreements;
- loan commitments issued.

The Bank recognises provisions for expected credit losses in an amount equal to the lifetime expected credit losses, except for the following instruments for which the amount of the provision is equal to 12-month expected credit losses:

- debt investment securities with low credit risk as of the reporting date;
- other financial instruments for which credit risk has not increased significantly since the date of their initial recognition.

If the actual repayment amounts were less than management's estimates, the Bank would have to account for additional impairment costs.

Changes in estimates of loan repayment probabilities may affect the amount of impairment losses recognized. For example, if the net present value of the estimated cash flows differs by plus/minus one percent, the impairment of loans as at 30 September 2026 would be UAH 21,244 thousand lower/higher (31 December 2025 would be UAH 20,945 thousand lower/higher).

4.2. Changes in accounting policies

The Bank has applied for the first time some amendments to the standards that came into force for annual periods beginning on or after 1 January 2025. The bank did not apply ahead of schedule any standards, clarifications or amendments that were issued but did not enter into force.

Amendments to IAS 21 "Impact of Changes in Exchange Rates" (hereinafter referred to as IAS 21) – "Impossibility of Exchange":

The changes concern the determination of the available possibility of exchanging currency for another currency. IAS 21 provides clarification on the definition of when a currency is "exchangeable" and provides that an entity assesses whether it is possible to exchange currency for another currency: (a) at the measurement date; and (b)

for a specified purpose. It also establishes how to determine the spot exchange rate if there is no possibility of exchange for the currency, and how to disclose this in the financial statements, in particular, IAS 21 provides for the disclosure of:

(a) the nature and financial impact of the impossibility of exchanging currency for another currency;

(b) the "spot" exchange rate(s) used;

(c) the evaluation process;

(d) the risks to which the entity is exposed due to the inability to exchange currency for another currency.

This amendment did not have a material impact on the Bank's financial statements.

4.3. Financial assets and financial liabilities

4.3.1. Classification and measurement of financial assets and financial liabilities

The Bank recognises financial assets and liabilities in its separate statement of financial position when it becomes a party to contractual obligations in respect of the instrument. Standard acquisitions and sales of financial assets and liabilities are recognised using settlement date accounting.

Financial assets

In accordance with IFRS 9 "Financial Instruments", the Bank classifies its financial assets into three categories

- at amortized cost (AC);
- at fair value through other comprehensive income (FVOCI);
- at fair value through profit or loss (FVPL).

Financial liabilities

The Bank classifies its financial liabilities as measured at amortized cost in accordance with IFRS 9 "Financial Instruments".

4.3.2. Provision for expected credit losses

The Bank recognizes an allowance for expected credit losses for all debt financial assets carried at amortized cost or fair value through other comprehensive income, as well as loan commitments and financial guarantee contracts in accordance with IFRS 9 "Financial Instruments". No impairment is recognized for equity instruments.

Determining a significant increase in credit risk

Subject to the requirements of IFRS 9 "Financial Instruments", the Bank believes that a significant increase in credit risk occurs no later than the moment when the number of days of overdue debt on an asset exceeds 30 days. The Bank recognises the number of days overdue by counting the number of days starting from the earliest day as of which payment has not been received in full.

Definition of default

A financial asset is classified by the Bank as a financial asset that has been in default in the following cases:

- it is unlikely that the borrower's loan obligations to the Bank will be repaid in full without the Bank taking such actions as the sale of collateral (if any); or

- the borrower's debt under any of the Bank's significant loan obligations is overdue for more than 90 days. Overdrafts are considered to be overdue debts on the next day when the client violated the recommended limit or was recommended for him, less than the amount of the current outstanding debt.

When assessing the occurrence of a default event on the borrower's obligations, the Bank takes into account the following indicators:

- qualitative: for example, violation of the restrictive terms of the contract (covenants);
- quantitative: for example, the status of overdue debts and non-payment of another obligation of the same issuer of the Bank; and
- based on data independently developed within the Bank and obtained from external sources.

The inputs to assessing the occurrence of a default event on a financial instrument and their significance may change over time to reflect changes in circumstances.

Creating a time structure of the probability of default

The credit risk stages are used as initial inputs in creating a time structure of the probability of default for positions exposed to credit risk. The Bank collects information on debt service and default rates for positions subject to credit risk, analyzed depending on the jurisdiction, type of product and borrower, and on the level of credit risk. The Bank uses statistical models to analyze the collected data and obtain estimates of the probability of default for the remaining period for positions exposed to credit risk and expect them to change over time.

This analysis includes the identification and calibration of the relationship between changes in the probability of default and changes in macroeconomic factors, as well as a detailed analysis of the impact of some other factors (for example, the practice of revising the terms of credit agreements) on the risk of default. For most positions exposed to credit risk, GDP growth is the key macroeconomic indicator.

Modification of the terms of financial assets and financial liabilities

If the terms of a financial asset change, the Bank assesses whether the cash flows for that modified asset differ significantly. If the cash flows differ significantly (a significant modification of terms), the rights to the contractual cash flows of the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and the new financial asset is recognised at fair value. Changes in the amount of cash flows of existing financial assets or financial liabilities are not considered to be modifications to terms if they are a consequence of the current terms of the contract, for example, changes in interest rates.

In addition, the Bank concludes that the modification of conditions is significant based on the following qualitative factors:

- change in the currency of a financial asset;
- change in the type of collateral or other means of improving the quality of the asset;
- a change in the conditions of a financial asset, which leads to non-compliance with the SPPI test criterion.

If the cash flows of a modified asset measured at amortised cost do not differ significantly, the modification of conditions does not result in the derecognition of the financial asset.

4.4. Cash and cash equivalents

According to the article "Cash and their equivalents", the Bank recognizes cash (cash on hand), funds in the National Bank of Ukraine, correspondent accounts and "overnight" deposits in banks, which can be converted into a known amount of cash on first demand and which carry a low risk cost changes. For the purposes of the Statement of Financial Position and the calculation of the Statement of Cash Flows, the funds of mandatory reserves or other funds and account balances are not included in the calculation of the article "Cash and their equivalents", if there are restrictions on their use.

4.5. Property and equipment

Property and equipment are initially recognised at cost, which consists of the actual cost of acquiring and bringing them into a usable condition.

After the initial recognition, property and equipment, except for the Bank's buildings, is measured at historical cost.

The Bank's buildings are measured, after initial recognition, at revalued amounts.

The Bank has determined the following useful lives for property and equipment:

Description	Useful life, years
Buildings and constructions	33.33
Machinery and equipment	4-10
Vehicles	5
Fixtures and fittings (furniture)	8.33
Other P&E	7-12

Property and equipment is depreciated on a straight-line basis.

4.6. Leases

The Bank applies the short-term lease recognition exemption for the lease agreements:

- to short-term leases (that is, leases with a lease term of no more than 12 months from the commencement date and that do not contain a purchase option);
- the underlying asset has an equivalent value of less than EUR 5,000 (the NBU exchange rate at date of recognition);
- lease agreements without a lease term;
- free of charge;
- unidentifiable.

The decision to apply the exemption in terms of low-value assets is made to each contract separately.

The Bank does not recognize as lease agreements on the right to use software, agreements on the use of licenses and license agreements. The Bank recognizes these assets as intangible assets in accordance with IAS 38 "Intangible Assets".

4.7. Investment property

After the initial recognition of an investment property, the Bank further measures it at fair value, changes in which are recognised in profit or loss.

4.8. Income tax

Income tax expenses (income) consist of current and deferred taxes.

Such income tax expense (income) is recognised in profit or loss, except when it relates to items recognised in other comprehensive income or directly in equity. In such cases, they are recognised in other comprehensive income or directly in equity.

Deferred tax is calculated at the tax rates that will be in effect during the period in which the asset will be sold or used and the liability will be settled.

4.9. Statutory capital and share premium

Equity contributions are recognised at historical cost. Equity contributions received before 31 December 2000 are recognised at indexed cost in accordance with IAS 29 "Financial Reporting in Hyperinflationary Conditions".

4.10. Commission income and expenses

Commissions that are not included in the cost of the loan (for example, fees for cash and settlement services, etc.) are recognized as commission income.

4.11. Functional currency

Items included in the Bank's financial statements are denominated in a currency that best corresponds to the economic substance of events and conditions relating to the Bank ("functional currency"). The functional currency and the currency of presentation of these financial statements is the hryvnia. All values are rounded to the nearest thousand dollars, unless otherwise stated.

Foreign exchange transactions

Assets and liabilities, income and expenses from transactions with foreign currencies are recorded in hryvnia equivalent at the official exchange rates of the NBU for foreign currencies and investment metals as of the date of reflection in accounting.

Accounting of income and expenses in foreign currency is carried out by converting into the currency of Ukraine at the rate of the National Bank of Ukraine on the date of the transaction under which income is received or expenses are incurred. In case of accrual of income or expenses in foreign currency, accounting is carried out at the exchange rate on the date of accrual.

In the statement of financial position, foreign currency assets and liabilities are recorded at the official exchange rate set by the NBU as of the reporting date. As at 30 September 2026, the NBU has set the following exchange rates:

Currency	30 September 2026	31 December 2025
USD	44,8624	42.3878
EUR	50,9278	49.8565

Note 5. New and revised standards

The following are the new standards/changes and clarifications that have been issued but have not yet entered into force as of the date of these financial statements. The bank plans to apply these new standards, changes and

clarifications, if applicable, after they enter into force. The bank analyzes in the current period the materiality of the impact of new and revised standards on financial statements.

Amendments to IFRS 7 "Financial Instruments: Disclosures" and IFRS 9 "Financial Instruments". The amendments clarify the classification and valuation of financial instruments, including disclosure requirements, and relate to the requirements for derecognition of financial instruments when settling financial liabilities using the electronic payment system; assessment of the contractual characteristics of the cash flows of financial assets, including those related to environmental, social and governance (ESG) aspects. The disclosure requirements for investments in equity instruments designated as measured at fair value through other comprehensive income have also been changed, and the disclosure requirements for financial instruments with notional characteristics that are not directly related to the underlying credit risks and costs have been added.

The amendments are effective for annual periods beginning on or after 1 January 2026. The Bank continues to assess changes in the areas covered by the amendments and their impact on the financial statements.

In December 2024, the International Financial Accounting Standards Board (IASB) published "*Amendments to IFRS 9 and IFRS 7 – Contracts Referring to Nature-Dependent Electricity"*. The amendments apply only to contracts that reference to nature-dependent electricity.

The amendments:

- Clarify the application of the "own-use" requirements for in-scope contracts.
- Amends the requirements for the definition of a hedged item in cash flow hedging relationships for contracts within the scope of application.
- Adding new disclosure requirements so that investors can understand the impact.

The amendments are effective for annual periods beginning on or after 1 January 2026.

Early adoption of the amendments is permitted only for the classification of financial assets and related disclosures. The Bank has not early adopted these amendments and does not expect the changes to have a material impact on the financial statements in future periods.

IFRS 18 "Presentation and Disclosure in Financial Statements"

In April 2024, the International Accounting Standards Board (IFRS) published *IFRS 18* "*Presentation and Disclosure in Financial Statements"*, which replaces *IAS 1* "*Presentation of Financial Statements"*. IFRS 18 introduces new requirements for the presentation of information in the income statement, including determined totals and subtotals. In addition, entities are required to classify all income and expenses in the income statement into one of five categories: operating, investment, financial, income taxes and discontinued operations, the first three of which are new. There are specific requirements and options for submitting information for business entities, such as JSC "PRAVEX BANK", which have a defined main activity (either providing financing to clients, or investing in a certain type of assets, or both).

The standard requires the disclosure of newly defined performance indicators, subtotals of income and expenses, and includes new requirements for the aggregation and disaggregation of financial information based on the defined "role" of primary financial statements and notes. In addition, narrow-scale changes have been made to *IAS 7* "*Statement of Cash Flows"*, which include changing the starting point for determining cash flows from operating activities using the indirect method from "profit or loss" to "operating profit or loss" and eliminating the possibility of classifying cash flows from dividends and interest. In addition, there are corresponding changes to several other standards.

The standard is effective for annual reporting periods beginning on or after 1 January 2027. The Bank is currently working to determine the impact of the standard on its financial statements.

Note 6. Cash and cash equivalents

Note 8. Loans and advances to customers

Table 8.1. Loans and advances to customers

			(in thousands of Ukrainian hryvnias)
Line	**Item**	**30/09/2026**	**31/12/2025**
1	**2**	**3**	**4**
1	Corporate loans	1,621,161	1,492,106
2	Retail mortgage loans	463,246	524,054
3	Loans to individual entrepreneurs	6,031	4,249
4	Retail consumer loans	244,795	250,075
5	Other retail loans	18	40
6	Provision for impairment of loans	(212,822)	(176,054)
7	**Total loans less provisions**	**2,122,429**	**2,094,470**

Line 7 in Table 8.1 corresponds to account "Loans and advances to customers" in the statement of financial position.

Loans, the terms of which were renegotiated.

As of September 30, 2026, there were no transactions under loan agreements to revise the terms for 9 months of 2026.

As of 31 December 2025, the carrying amount of loan agreements for which the terms were revised in 2025 is UAH 3,257 thousand (of which: loans to individuals – UAH 3,257 thousand). The amount of the decrease in the reserve for 2025 under such revised contracts amounted to UAH 853 thousand (of which: decrease in loans to individuals – UAH 853 thousand).

Concentration of loans to customers

The Bank believes that potential concentration risk with respect to customers may arise when at least 10% of the value of the net loan portfolio is provided to a limited number of debtors. As of 30 September 2026, financing provided to two clients amounted to UAH 413,750 thousand, or 18% of the value of the net loan portfolio (2025: UAH 409,294 thousand, or 18% to two clients).

Note 10. Investment property

The valuation of investment real estate was carried out by independent appraisers Limited Liability Company "VALKOL" and Private Enterprise "Consulting Company Argument" as of 30 November 2025 with further confirmation by the appraisers that there were no significant changes in the market as of 31 December 2025. At the time of the appraisal, Limited Liability Company "VALKOL" and Private Enterprise "Consulting Company

Argument" had the appropriate certification in accordance with the current legislation of Ukraine and previous experience in conducting valuations of similar property.

Table 10.1. Fair value of investment property

			(in thousands of Ukrainian hryvnias)
Line	**Item**	**30/09/2026**	**31/12/2025**

1	**Fair value of investment property at the beginning of the period**	**8,220**	**8,821**
2	Disposal (sale)	(4,304)	–
3	Transfer of fixed assets to/(from) the investment property group	(3,671)	–
4	(Decrease) increase in investment property value	–	(601)
5	**Fair value of investment property at the end of the period**	**245**	**8,220**

Line 5 in Table 10.1 corresponds to account "Investment property" in the statement of financial position.

The fair value of the valuation objects is determined on the basis that corresponds to the market value, excluding value added tax. In the process of calculating the market value of valuation objects, comparative and income methods were used.

Comparative approach.
The essence of the approach is to determine the value of an object based on the analysis of prices of actual purchase and sale transactions or offers for similar assets on the open market. The valuation is based on the principle of substitution, according to which a knowledgeable buyer will not pay more for an asset than the cost of acquiring an object of similar utility. The process involves selecting comparable objects and making adjustments for differences in characteristics, time of sale and terms of transactions. The result obtained reflects the most likely price formed by current supply and demand.

Income approach.
This approach is based on calculating the present value of the future economic benefits that are expected to be obtained from owning an asset over its useful life. Value is determined by converting expected cash flows (income) into a single current value using capitalization or discounting methods. The approach reflects the object's ability to generate profits, considering the risks and time value of money. This method is a priority for assets, the main purpose of holding which is to receive regular income or capital gains.

Table 10.2. Amounts recognised in the statement of profit or loss

			(in thousands of Ukrainian hryvnias)
Line	**Income and expense**	**30/09/2026**	**30/09/2025**
1	**2**	**3**	**4**
1	Income from the sale of investment property	458	–
2	Income from the rental of investment real estate	113	150

The data in Table 10.2 are reported in Note 27 "Other Income," of the Statement of Income or Loss.

During nine months of 2026 and 2025 the Bank leased investment properties and received income.

As of 30 September 2026, and as of 31 December 2025, there are no property, plant and equipment items that are:

- pledged as collateral;
- temporarily not in use (conservation, reconstruction, etc.).

As of 30 September 2026, and 31 December 2025, there are no fixed assets (movable property) in respect of which there are restrictions on the right of ownership (order).

As of 30 September 2026, historical (revalued) cost of fully depreciated/amortised property, plant and equipment, intangible assets and other non-current assets amount to UAH 230,053 thousand (2025: UAH 190,642 thousand):

- property, plant and equipment – UAH 72,134 thousand (2024: UAH 73,794 thousand);
- intangible assets – UAH 169,004 thousand (2024: UAH 102,432 thousand);
- other non-current assets – UAH 8,915 thousand (2024: UAH 14,416 thousand).

As of 30 September 2026, and 31 December 2025, no impairment (impairment) of fixed assets and intangible assets was recognized.

The result of the real estate appraisal conducted in 2026 prior to the initial classification of the assets as held for sale by the independent appraisal firm CBRE as of May 11, 2026, amounted to a write-down of UAH 1,311 thousand, which was charged to equity. The result of the real estate appraisal conducted in 2025 by the independent appraisal firms VALCOL LLC and Argument Consulting Company, as of November 30, 2025, was a revaluation in the amount of UAH 56,497 thousand, including an increase in capital of UAH 56,817 thousand and an increase in expenses of UAH 320 thousand.

As of 30 September 2026, and 31 December 2025, there were no internally generated intangible assets.

As of 30 September 2026, the carrying value of real estate, which would be recognized if the assets were accounted for according to the cost model less depreciation, would be UAH 81,750 thousand (2025: UAH 96,136 thousand).

As of 30 September 2026, and 31 December 2025, right of use assets include building, constructions and cars. Right of use assets are included in the item “Fixed assets, including right-of-use assets” of the Statement of Financial Position.

During the 9 months of 2026, the Bank took measures to ensure continuous operations, acquiring hybrid inverters and IT equipment totaling UAH 1,024 thousand, as well as licenses amounting to UAH 380 thousand (2025: hybrid inverters and charging stations were purchased for the amount of UAH 5,812 thousand).

1	**2**	**3**	**4**
1	**Non-current assets held for sale at the beginning of the period**	–	–
2	Transfer from property, plant and equipment	66,119	–
3	**Non-current assets held for sale at the end of the period**	**66,119**	–

Based on Decision No. 12_26 of the Management Board of JSC "PRAVEX BANK" dated June 3, 2026, and the approved Plan for the Sale of Real Estate Properties, 20 real estate properties that were used as offices were reclassified in the accounting records.

The Sales Plan provides for their sale within 12 months and was approved for the period from June 1, 2026, to May 31, 2027.

As of the date of approval of the Sales Plan, the real estate properties were not used in operating activities, were available, ready for sale, and their sale is highly probable. The properties were reclassified to the disposal group based on the lower of their carrying amount and fair value less costs to sell.

The sale of these properties will reduce operating expenses and improve asset management efficiency.

Note 15. Due to customers

Table 15.1. Breakdown of amounts due to customers

			(in thousands of Ukrainian hryvnias)

4	**Total amounts due to customers**	**15,377,426**	**14,053,463**

Line 4 in Table 15.1 corresponds to account "Due to customers" in the statement of financial position.

The Bank believes that a potential concentration risk may arise when at least 10% of the carrying value of amounts due to customers (excluding subordinated debt and loans from international financial institutions) are attracted from a limited number of creditors. As 30 September 2026, and 2025, the funds of one and one clients amounted to UAH 2,409,111 thousand and UAH 1,785,673 thousand, respectively, which was equal to 15.67% and 12.71%, respectively, of the amount of customer funds as of the reporting date.

As of 30 September 2026, there were three deposits as collateral for loans for a total of UAH 49,919 thousand. UAH (2025: three deposits in the amount of UAH 47,166 thousand).

Note 16. Other borrowed funds

Table 16.1. Other borrowed funds as of 30 September 2026 and for the nine months then ended

			(in thousands of Ukrainian hryvnias)
Line	**Item**	**30/09/2026**	**31/12/2025**
1	**2**	**3**	**4**
1	Loans from international and other financial organizations	259,316	297,373
2	**Total**	**259,316**	**297,373**

In December 2020, the Bank signed an agreement with EUROPEAN INVESTMENT BANK (EIB) for a loan totaling EUR 30,000,000, to finance and support small and medium-sized businesses in the context of the Covid-19 pandemic.

The loan is provided in the form of tranches each with a minimum amount of at least EUR 5,000 thousand. According to the terms of the contract, the loan can be granted both in dollars and in euros.

According to the Agreement, the following covenants are provided:

- change of ownership: in the event of such an event occurring, or if there is a possibility that it will occur, the Bank is obliged to immediately inform EIB about it. In such a case, EIB has the right to demand early repayment of the loan together with the accrued interest;
- loss of credit rating of Intesa Sanpaolo S.p.A.: in the event of such an event, the Bank is obliged to provide additional security for the Loan in the form of a guarantee, cash collateral or other security for cash collateral or other security acceptable to the Bank.

As of 30 September 2026, the Bank was not in breach of the covenants stated in the agreement.

During the nine months of 2026, the Bank did not receive new loans or tranches for other borrowed funds, but partially repaid in tranches:

- for the 1st tranche of USD 7 million (with a term of 7 years at an annual interest rate of 2.315%), a partial payment of USD 636 thousand was made on 22 June 2026. The remaining balance for this tranche as of 30 September 2026, amounts to USD 3,182 thousand (or UAH 142,744 thousand at the exchange rate as of 30 September 2026);
- for the 2nd tranche of EUR 5 million (with a term of 7 years at an annual interest rate of 0.785%), a partial payment of EUR 455 thousand was made on 22 June 2026. The remaining balance for this tranche as of 30 September 2026, amounts to EUR 2,273 thousand (or UAH 115,745 thousand at the rate as of 30 September 2026).

During 2025, the Bank did not receive new loans or tranches for other borrowed funds, but partially repaid in tranches:

- for the 1st tranche of USD 7 million (with a term of 7 years at an annual interest rate of 2.315%), a partial payment of USD 636 thousand was made on 23 June 2025, and a partial payment of USD 636 thousand was made on 22 December 2025. The remaining balance for this tranche as of 31 December 2025, amounts to USD 3,818 thousand (or UAH 161,844 thousand at the exchange rate as of 31 December 2025);
- for the 2nd tranche of EUR 5 million (with a term of 7 years at an annual interest rate of 0.785%), a partial payment of EUR 455 thousand was made on 23 June 2025, and a partial payment of EUR 455 thousand was made on 22 December 2025. The remaining balance for this tranche as of 31 December 2025, amounts to EUR 2,727 thousand (or UAH 135,972 thousand at the rate as of 31 December 2025).

Note 31. Capital management

The Bank's shareholders pay sufficient attention to ensuring capital adequacy by increasing capital, namely increasing the authorized capital as the main component of the capital link, or activating capital optimization.

The Bank's capital is formed for the purpose of:

- cost-effective use of own funds;
- coverage of all possible types of risks assumed by the Bank;
- optimization of the structure of assets and liabilities in terms of attraction and placement of funds.

As of September 30, 2026 and 2025, the Bank complied with the capital adequacy ratios:

as of September 30, 2026, the regulatory capital adequacy ratio (N_{RC}) is 39.63% and as of September 30, 2025 is 38.25%;

as of September 30, 2026, the Tier 1 capital adequacy ratio (N_{TIER1}) is 39.59% and as of September 30, 2025 is 38.21%;

as of September 30, 2026, the Tier 1 fixed capital adequacy ratio (N_{CET1}) is 39.59% and as of September 30, 2025 is 38.21%.
